PROCUREMENT AND SUPPLY MANAGEMENT

About This Document

This document is a static version of the Global Health Supply Chain Program-Procurement and Supply Management (GHSC-PSM) project's online e-Catalog. Because this static document is updated once per quarter, prices, quantities, and products may not be up to date. For the most accurate product availability and pricing information, GHSC-PSM recommends use of the full, online e-Catalog. If you already have login credentials, you can [access the e-Catalog here: https://psmsso.ghsc-psm.org/](https://psmsso.ghsc-psm.org/)

Prices in the Catalog are generally based on the average contract price offered by suppliers, as determined through scheduled competitions and excluding outliers. For products not included in regular competitions, pricing is based on a rolling 6-month median. Laboratory commodity pricing is also based on a rolling 6-month median, with the exception of viral load and early infant diagnosis reagents, which use a blended average price that accounts for implied service costs. For additional information about Catalog pricing for specific commodities or commodity types, please contact us via the information listed below.

Requirements for Accessing the Online e-Catalog

Before gaining full access to the e-Catalog or to GHSC-PSM's Automated Requisition Tracking Management Information System (ARTMIS), users must complete a series of trainings on its five key components:

1. Source + Manage Suppliers: Sourcing, Contract Management, Supplier Lifecycle Management
2. Browse Catalog + Requisition Orders: Browse Catalog (e-Catalog), Creating/Modifying/Approving Requisition Orders
3. Fulfill Orders: Modifying Requisition Orders, Replenishment Orders, Drop Shipments, Purchase Orders
4. Report + Analyze: Ad hoc and Pre-Defined Reports
5. Toolbox: Freight Estimate Tool (FET); Order Promising Tool (OPT), Quality Assurance Management System (QAMS)
